This is function file to define unit step impulse.

```
function[u] = u(n)
    len = length(n);
    u = zeros(1,len);
    for i = 1:1:len
        if n(1,i)>=0
            u(1,i) = 1;
        end
    end
end
```
